

**WESTGATE FREEWAY MANAGED  
MOTORWAY PROJECT**

***Project Synopsis***

- *Access track construction at 12no locations*
- *Bulk Earthworks*
- *Pavement construction*

**Client:** Visionstream (Leighton)

**Location:** Melbourne, Victoria

**Year:** 2014

**Value:** \$70K

The Westgate Managed Freeway Project involved the construction of overhead gantries and installation of variable speed signage that could be controlled remotely via the VicRoads control room.

Novel Group was engaged to construct all weather access tracks to allow footing construction for the gantries in twelve locations.

The project involved:

- Construction of access tracks at twelve locations
- Supply of plant, materials and supervision
- Bulk excavation
- Pavement construction

Works were undertaken over a period of 3 months.
